FIND TYRES

We appreciate that not everyone's lives run Monday to Friday, 9:00am to 5:00pm, our new website gives our customers that added flexibility.

Why not have a look!

MOT & Service Offer!

All MOT's are currently £30.00 when booked in conjunction with any service!

Visit www.dunningtonmotorcare.com to book yours now!

Emission Control Service (ECS)

Dunnington Motor Care are now offering our customers Emission Control Services (otherwise known as ECS)!

An ECS Service can be provided with any service type. Contamination is removed from your engine, improving the running of your engine, ensures low emissions, improves fuel economy and improved vehicle performance.

An ECS Service also improves engine performance and response, poor starting, hesitation and flat spots and poor fuel economy.

From our own experience, not only have we found all of the above, but our vehicles are easier starting, and they run much smoother.

Not only are you benefiting your pocket and vehicle, but by ensuring that your vehicle has lower exhaust emissions, you are also protecting the environment. This can also prove useful should you ever find yourself having a roadside

emissions test.

The effectiveness of the methods and products used to complete an ECS service are guaranteed by the fact that should your vehicle fail a police emissions test within 6 months of the service test, Forte will pay your £60.00 fine.

Also, if the car has any contamination related to running problems after the service, your vehicle will be treated again free of charge.

Not only this, but if you perceive no difference in your vehicles performance after an ECS, you will be credited back the cost of the ECS!

For more information, give us a call on 01904 481818!

MacMillan Cancer Support Fundraiser

On Friday the 27th September, Dunnington Motor Care managed to raise an amazing £154.31 in donations for MacMillan Cancer Support thanks to our amazing customers!

There were some amazing cakes on offer, provided by The Old Butchers Coffee Shop in Dunnington.

What are Winter tyres?

It's the end of October and the first frosts have already begun.

With all of the wet weather we have been experiencing over the last few weeks, we have experienced a large uptake with the amount of winter tyre's we have been selling, and yet many still do not know the difference between 'All Season' tyres and 'Winter' tyres?

Normal 'all season' tyres stiffen up when the temperature drops. Winter tyres use a type of rubber (with a high silica content) and a tread pattern designed to stay flexible in low temperatures - below +7C - to give better braking and handling performance not only on snow and ice, but also in wet and cold conditions.

Dunnington Motor Care are always happy to swap our customers tyres over for them from season to season, or, if you would like to get an idea of cost for a new set of Winter tyres, why not head over to the tyre checker on our [website?](#)

FREE Winter Vehicle Health Checks

Is your vehicle ready for Winter?

Not sure? After the last year's unpredictable Winter, it makes sense to prepare in advance and make sure your vehicle is ready.

Why not visit Dunnington Motor Care and let us carry out a **FREE** Winter Check?

Even if you check your oil and tyres regularly, our mechanics can give you the peace of mind to know you are prepared for the challenges of the winter months ahead.

Call us on 01904 481818 for more information on what the health check involves!

Winter
